A system for users to register an account and rent video games online. Double Filter through video games, by popularity, genre, ESRB rating, release date. Double filter meaning being able to filter by two categories at the same time. Has a review system for users to leave a review. Library of games rented, and the ability to add games to the library. Managers should be able to add or remove games to the library. Request a game feature. Game detail page. Separate tabs for store, library, and profile. Search bar for browsing through games. Able to delete your account or cancel subscription. Scrolling picture to showcase a couple games. Different tiers of subscription that increases the amount of games you can rent at one time. A log of how much time is spent on each game. Profile shows what games you spent the most time on.
